

Concorde Equi-librium steel

Our Equi-Librium design now adapted specifically for race horses!

This shoe offers the perfect balance between peak performance and overload, by an increased fluency of break-over. Its anatomical shape enables the horse to move more easily in any direction, the peak load during hoof-unrollment decreases substantially. Concorde Equi-Librium has proven to enhance performance and prevent injuries.

Innovative features:

- following the anatomical foot shape
- special clip positioning for optimal support while maintaining a sound hoof-mechanism
- unique for race-specific shoes: V-fullering providing a secure nail fit
- concave section to reduce weight and for an easier access to the sole
